## The most intuitive Fire RMS technology!

Designed by first responders, Street Fire RMS offers superior data-collection technology that was created to improve the quality of data collected while at the same time making data collection easier and more flexible than ever.

Its intuitive design allows your personnel to gather more accurate documentation in less time. The predefined layout can be entirely customized to fit your agency's workflow.

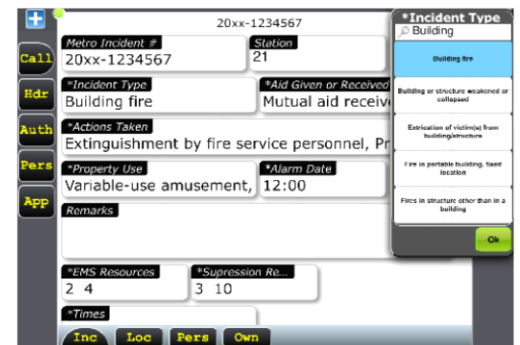

The Street Fire RMS mobile application is designed to work on a variety of hardware devices without reliance on any one operating system. The application is HTML5-compliant and web-based, and it will work on virtually any tablet device.

We are constantly improving our technology. More importantly, the needs of our clients always drive development priorities. We work directly with our agencies on technology enhancements to address both current and future needs.

If you need any assistance, we're always here to help. With a 24/7 emergency support line, we'll keep your system running smoothly, allowing you to focus on what really matters.
